

# California's Marine Life Protection Act Initiative presents...

## *North Coast Public Open Houses*

*July 20, 21 and 22  
5:00 - 8:00 p.m.*

The Marine Life Protection Act (MLPA) requires the state to examine and redesign California's system of marine protected areas (MPAs). The success of this effort depends on the participation and input of stakeholders and the general public.

A series of public open houses will provide an introduction to the MLPA Initiative's North Coast Project, which will cover state waters from the California border with Oregon to Alder Creek near Point Arena in Mendocino County.

Each open house will provide an opportunity for you to learn more about the MLPA Initiative process and how you can get involved. Questions are welcome!

***All are welcome to attend. Drop by anytime between 5:00 and 8:00 p.m.***

**Monday, July 20**  
Wharfinger Building  
#1 Marina Way  
Eureka, CA 95501

**Tuesday, July 21**  
Dana Gray Elementary School  
1197 Chestnut Street  
Fort Bragg, CA 95437

**Wednesday, July 22**  
Cultural Center  
1001 Front Street  
Crescent City, CA 95531

***For more information, please contact the MLPA Initiative at  
916-654-1885 or visit [www.dfg.ca.gov/mlpa](http://www.dfg.ca.gov/mlpa)***

# *California's Marine Life Protection Act Initiative North Coast Project (2009-2011)*

**What is the Marine Life Protection Act (MLPA) Initiative?** The MLPA Initiative is a public-private partnership designed to help the State of California implement the MLPA by using the best readily available science and the advice and assistance of scientists, resource managers, experts, stakeholders and members of the public.

**Why this project?** The MLPA, which was signed into law in 1999, directs the state to redesign California's system of marine protected areas to increase its coherence and effectiveness in protecting the state's marine life and habitats, marine ecosystems and marine natural heritage, as well as to improve recreational, educational and study opportunities provided by marine ecosystems.

**What are marine protected areas?** Marine protected areas (MPAs) are named, discrete geographic marine or estuarine areas designed to protect or conserve marine life and habitat. Existing examples of MPAs on the north coast of California include Punta Gorda State Marine Reserve, Point Cabrillo State Marine Conservation Area and Van Damme State Marine Conservation Area.

**What can I do in a marine protected area?** There are three types of MPAs: state marine reserve, state marine park, and state marine conservation area. Each type has different rules about what activities can or cannot occur within its boundaries. In general, marine reserves do not allow any type of extractive activities (including fishing or kelp harvesting); marine parks do not allow any commercial extraction; and marine conservation areas do not allow some combination of commercial and/or recreational extraction.

**When and where did the MLPA Initiative start?** Because California has 1,100 miles of coastline to consider, five individual geographic areas, called study regions, were defined. Though the planning processes for each study region are separate, all are conducted in the same way, with an emphasis on public involvement. To date, MPA redesign efforts have begun in three of the five regions: the central coast (from Pigeon Point in San Mateo County to Point Conception in Santa Barbara County), the north central coast (from Alder Creek/Point Arena in Mendocino County to Pigeon Point, including the Farallon Islands), and the south coast (Point Conception in Santa Barbara County to the California border with Mexico in San Diego County, including offshore islands); all are now in various stages of the planning process. The north coast is the fourth study region to be examined.

**What are the basic steps in the MLPA Initiative process?** An appointed, regional stakeholder group makes proposals for MPAs with advice and guidance from other groups and the public; these proposals are reviewed by a science advisory team, and then by a policy level blue ribbon task force that makes recommendations to the California Fish and Game Commission, the decision-making body under the MLPA.

**When will the MLPA Initiative be in my area?** The MLPA Initiative is just beginning the planning process in the north coast study region. Following the north coast, the MLPA Initiative will focus on San Francisco Bay (Golden Gate Bridge northeast to the Carquinez Bridge).

**How do I get involved in the process?** The success of the MLPA Initiative is dependent upon the active involvement of stakeholders and the general public in a variety of ways. Opportunities for involvement include participating in a regional stakeholder group, attending workshops and public meetings, and providing input on MPA proposals and supporting documents as they are developed. The MLPA North Coast Project will afford many opportunities for public involvement in the months to come. For more information, visit [www.dfg.ca.gov/mlpa](http://www.dfg.ca.gov/mlpa).
