Subject: Support for Map 2

We like map2 because it keeps the back side of Catalina Is. open to fish for white seabass. Map3 closes most of the back side where we fish for the WSB. Ben Weston, Salta Verde and the Farnsworth would be closed forever.

We the fishermen raised these fish in pens inside Newport Harbor, Carlsbad and other places. To take away the places to fish for a species we have taken care of for years is just a slap in the face.

Please consider Map2 as the best way to implement MPA's here in Socal.

Thank you,
Bobby Gowin
