

**Marine Life Protection Act Initiative**

**Science Guidelines to Help Meet the Goals of the MLPA**

Presentation to the North Central Coast Regional Stakeholder Group  
 August 23, 2007 • San Rafael, CA  
 Dr. Steve Gaines, Member, MLPA SAT 2005-2007

---

---

---

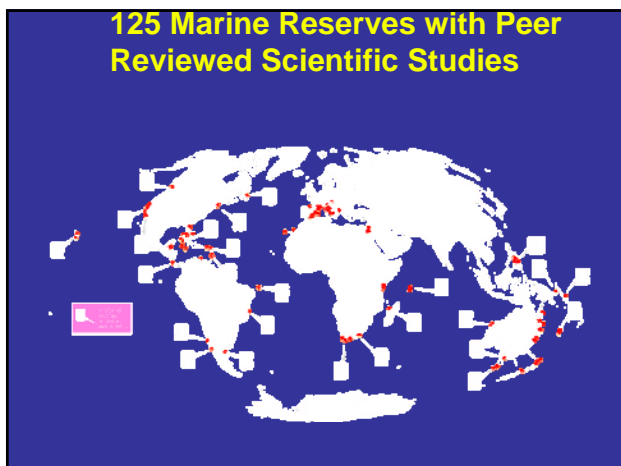

---

---

---

---

## Science Guidelines to Meet Goals of MLPA

- Define Habitats
- Define Levels of Protection
- Size and Spacing of a Network

---

---

---

---

---

---

---

---

### MLPA Goals

- To protect the natural diversity and function of **marine ecosystems**.
- To help sustain and restore **marine life populations**.
- To improve **recreational, educational, and study opportunities** in areas with minimal human disturbance.
- To protect representative and unique **marine life habitats**.
- Clear objectives, effective management, adequate enforcement, sound science.
- To ensure that MPAs are designed and managed as a **network**.

---

---

---

---

---

---

---

---

### MLPA Goals - Habitats

- To protect the natural diversity and function of **marine ecosystems**.
- To help sustain and restore **marine life populations**.
- To improve **recreational, educational, and study opportunities** in areas with minimal human disturbance.
- To protect representative and unique **marine life habitats**.
- Clear objectives, effective management, adequate enforcement, sound science.
- To ensure that MPAs are designed and managed as a **network**.

---

---

---

---

---

---

---

---

**Coastal marine habitats are created by:**

• **Seafloor topography and surface type**

• **Oceanographic properties**  
(temp., currents, nutrients)

**Biogenic habitats**  
(kelp forests, seagrass, sponges & corals)

---

---

---

---

---

---

---

---

---

---

**MLPA Master Plan for MPAs**  
**Marine Habitats**

Seafloor Habitats

- Rocky reefs
- Intertidal zones
- Sandy or soft ocean bottoms
- Underwater pinnacles
- Submarine canyons
- ~~Seamounts~~

Depth Zones

- Intertidal
- Intertidal to 30 m
- 30 to 100 m
- 100 to 200 m
- 200 m and deeper

---

---

---

---

---

---

---

---

---

---

**MLPA Master Plan for MPAs**  
**Marine Habitats**

Seafloor Habitats

- Rocky reefs
- Intertidal zones
- Sandy or soft ocean bottoms
- Underwater pinnacles
- Submarine canyons
- ~~Seamounts~~

Depth Zones

- Intertidal
- Intertidal to 30 m
- 30 to 100 m
- 100 to 200 m
- 200 m and deeper

Oceanographic Habitats

- Upwelling areas
- Freshwater plumes
- Retention zones

---

---

---

---

---

---

---

---

---

---

## MLPA Master Plan for MPAs Marine Habitats

### Seafloor Habitats

- Rocky reefs
- Intertidal zones
- Sandy or soft ocean bottoms
- Underwater pinnacles
- Submarine canyons
- Seamounts

### Depth Zones

- Intertidal
- Intertidal to 30 m
- 30 to 100 m
- 100 to 200 m
- 200 m and deeper

### Oceanographic Habitats

- Upwelling areas
- Freshwater plumes
- Retention zones

### Biogenic Habitats

- Kelp forests
- Seagrass beds

---

---

---

---

---

---

---

---

---

---

---

---

## Biogenic Habitats

Kelp forests

Seagrass meadows

Deep-water sponges & corals

---

---

---

---

---

---

---

---

---

---

---

---

## Habitat Representation

### MPA Distributions

### Habitat Distributions

---

---

---

---

---

---

---

---

---

---

---

---

## Levels of Protection

### Identified Levels of Protection

- **High Protection**
  - **State marine reserve (SMR):** No take
  - **State marine conservation area (SMCA):** no take except salmon and coastal pelagics in water depth >50m
- **Moderate Protection**
  - **SMCA:** no take except salmon and pelagic fishes (>50m deep), squid, crab, spot prawn, and giant kelp (by hand)
- **Low Protection**
  - **SMCA:** allows various forms of commercial and recreational fishing and mechanical kelp harvesting
  - **State marine park (SMP):** allows various forms of recreational fishing

---

---

---

---

---

---

---

---

---

---

## MLPA Goals - Populations

- To protect the natural diversity and function of **marine ecosystems**.
- To help sustain and restore **marine life populations**.
- To improve **recreational, educational, and study opportunities** in areas with minimal human disturbance.
- To protect representative and unique **marine life habitats**.
- Clear objectives, effective management, adequate enforcement, sound science.
- To ensure that MPAs are designed and managed as a **network**.

---

---

---

---

---

---

---

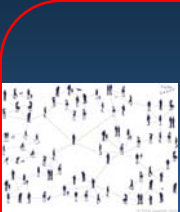

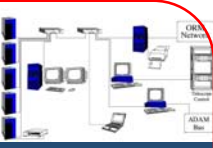

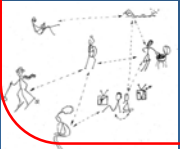

---

---

---

## What is a Network?

---

---

---

---

---

---

---

---

---

---

## Networks Rely on Connections

Network

Broken Network

---

---

---

---

---

---

---

---

## Connections through movement

Adults vs. Young

---

---

---

---

---

---

---

---

## Adults at Risk When They Leave Reserve

---

---

---

---

---

---

---

---

To achieve sustainable populations:  
MPA size > movement of adults.

---

---

---

---

---

---

---

---

---

---

### Adult Movement for Species of Interest

0 – 1 km	1 – 10 km	10 – 100 km	100 – 1000 km	> 1000 km
<b>Invertebrates</b> Abalone Mussel Octopus Sea Star Snail Urchin <b>Rockfishes</b> Blk. & Yellow China Gopher Kelp <b>Other Fishes</b> Gobie Sculpin * Seasonal Migration	<b>Rockfishes</b> Black Brown Copper Greenspotted Olive Vermilion <b>Other Fishes</b> Cabezon Ca. Halibut Lingcod 	<b>Invertebrates</b> Dung. Crab* <b>Rockfishes</b> Bocaccio Canary Yellowtail Widow <b>Other Fishes</b> Anchovy Herring Sardine <b>Birds</b> Gulls Cormorants <b>Mammals</b> Harbor Seal Otter	<b>Fishes</b> Big Skate Pacific Halibut Sablefish* Salmonids* Sturgeon Whiting* <b>Birds</b> Gulls* <b>Mammals</b> Porpoises Sea Lions*	<b>Invertebrates</b> Jumbo Squid* <b>Fishes</b> Sharks* Tunas* <b>Turtles*</b> <b>Birds</b> Albatross* Pelican* Shearwater* Shorebirds* Terns* <b>Mammals</b> Dolphins Sea Lions* Whales*

---

---

---

---

---

---

---

---

---

---

### Larger Reserves Benefit More Species

0 – 1 km	1 – 10 km	10 – 100 km	100 – 1000 km	> 1000 km
<b>Invertebrates</b> Abalone Mussel Octopus Sea Star Snail Urchin <b>Rockfishes</b> Blk. & Yellow China Gopher Kelp <b>Other Fishes</b> Gobie Sculpin * Seasonal Migration	<b>Rockfishes</b> Black Brown Copper Greenspotted Olive Vermilion <b>Other Fishes</b> Cabezon Ca. Halibut Lingcod 	<b>Invertebrates</b> Dung. Crab* <b>Rockfishes</b> Bocaccio Canary Yellowtail Widow <b>Other Fishes</b> Anchovy Herring Sardine <b>Birds</b> Gulls Cormorants <b>Mammals</b> Harbor Seal Otter	<b>Fishes</b> Big Skate Pacific Halibut Sablefish* Salmonids* Sturgeon Whiting* <b>Birds</b> Gulls* <b>Mammals</b> Porpoises Sea Lions*	<b>Invertebrates</b> Jumbo Squid* <b>Fishes</b> Sharks* Tunas* <b>Turtles*</b> <b>Birds</b> Albatross* Pelican* Shearwater* Shorebirds* Terns* <b>Mammals</b> Dolphins Sea Lions* Whales*

---

---

---

---

---

---

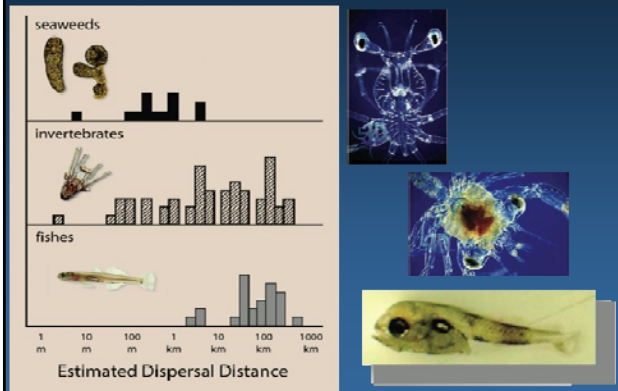

---

---

---

---

## Same Rule for Movement of Young

---

---

---

---

---

---

---

---

## Minimum Size Guidelines: Min: 5 - 10 km Preferred: 10 - 20 km

0 - 1 km	1 - 10 km	10 - 100 km	100 - 1000 km	> 1000 km
<b>Invertebrates</b> Abalone Mussel Octopus Sea Star Snail Urchin <b>Rockfishes</b> Blk. & Yellow China Gopher Kelp <b>Other Fishes</b> Gobbie Sculpin	<b>Rockfishes</b> Black Brown Copper Greenspotted Olive Vermilion <b>Other Fishes</b> Cabezon Ca. Halibut Lingcod	<b>Invertebrates</b> Dung Crab* <b>Rockfishes</b> Bocaccio Canary Yellowtail Widow <b>Other Fishes</b> Anchovy Herring Sardine <b>Birds</b> Gulls Cormorants <b>Mammals</b> Harbor Seal	<b>Fishes</b> Big Skate Pacific Halibut Sablefish* Salmonids* Sturgeon Whiting* <b>Birds</b> Gulls* <b>Mammals</b> Porpoises Sea Lions*	<b>Invertebrates</b> Jumbo Squid* <b>Fishes</b> Sharks* Tunas* <b>Turtles*</b> <b>Birds</b> Albatross* Pelican* Shearwater* Shorebirds* Terns* <b>Mammals</b> Dolphins Sea Lions* Whales*

---

---

---

---

---

---

---

---

## The Other Dimension

Extend from Shore to 3 mi Boundary

---

---

---

---

---

---

---

---

## For Larvae, Multiple MPAs Change the Rules

---

---

---

---

---

---

---

---

## Dispersal Between MPAs is Just as Beneficial as Retention Within MPAs

---

---

---

---

---

---

---

---

## Key Criterion:

Spacing of MPAs < Larval Dispersal

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

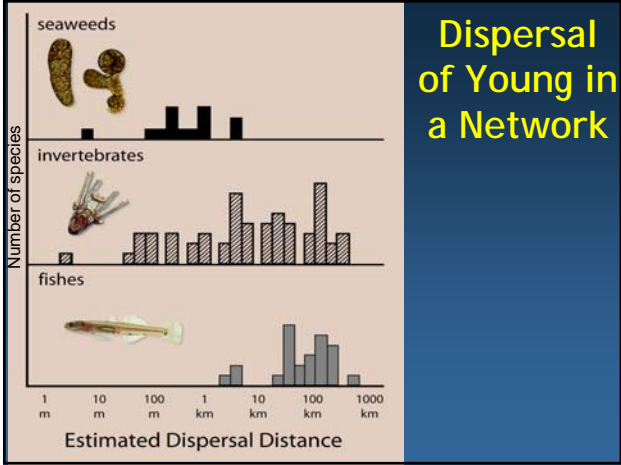

---

---

---

---

---

---

---

---

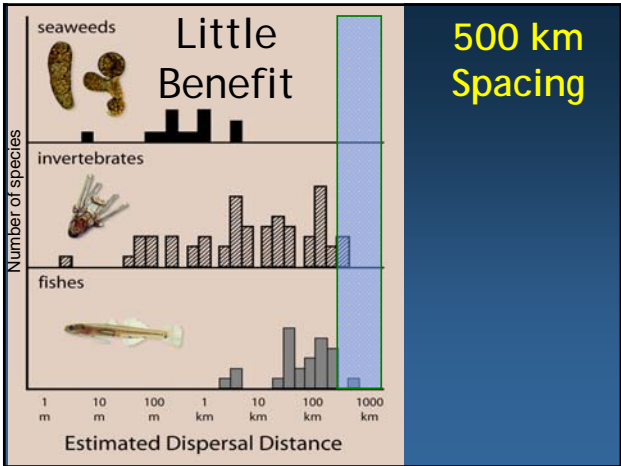

---

---

---

---

---

---

---

---

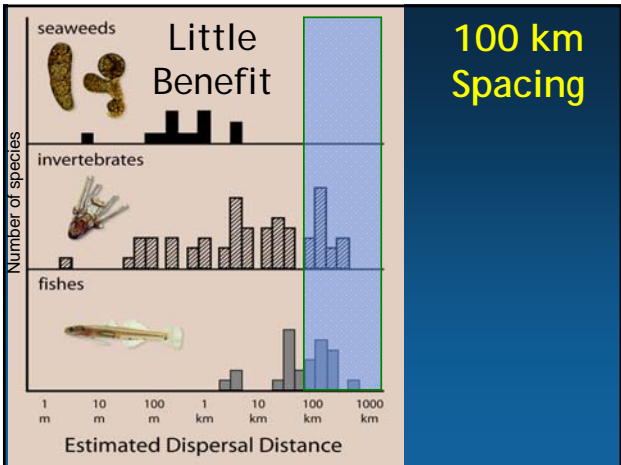

---

---

---

---

---

## Why do Guidelines Have Ranges?

- 🏠 Size: 5 to 10 km minimum, 10 to 20 km preferred
- 🏠 Max Spacing: 50 to 100 km

---

---

---

---

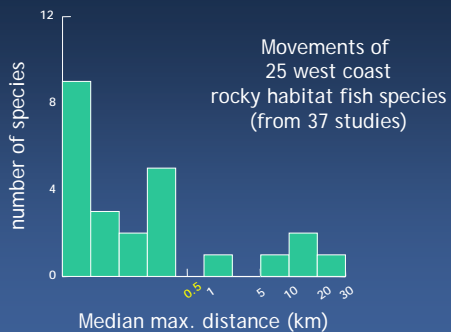

---

---

---

---

### Minimum Size Guidelines: Min: 5 - 10 km Preferred: 10 - 20 km

Freiwald, unpublished

---

---

---

---

---

---

---

---

### Minimum Size Guidelines: Min: 5 - 10 km Preferred: 10 - 20 km

0 - 1 km	1 - 10 km	10 - 100 km	100 - 1000 km	> 1000 km
<b>Invertebrates</b> Abalone Mussel Octopus Sea Star Snail Urchin <b>Rockfishes</b> Blk. & Yellow China Gopher Kelp <b>Other Fishes</b> Gobie Sculpin	<b>Rockfishes</b> Black Brown Copper Greenspotted Olive Vermilion <b>Other Fishes</b> Cabezon Ca. Halibut Lingcod 	<b>Invertebrates</b> Dung. Crab* <b>Rockfishes</b> Bocaccio Canary Yellowtail Widow <b>Other Fishes</b> Anchovy Herring Sardine <b>Birds</b> Gulls Cormorants <b>Mammals</b> Harbor Seal Otter	<b>Fishes</b> Big Skate Pacific Halibut Sablefish* Salmonids* Sturgeon Whiting* <b>Birds</b> Gulls* <b>Mammals</b> Porpoises Sea Lions*	<b>Invertebrates</b> Jumbo Squid* <b>Fishes</b> Sharks* Tunas* <b>Turtles*</b> <b>Birds</b> Albatross* Pelican* Shearwater* Shorebirds* Terns* <b>Mammals</b> Dolphins Sea Lions* Whales*
