

Appendix A - Metadata

Layer Names	Disclaimer	Source
Aquaculture Leases	This layer is considered draft and is subject to change.	California Department of Fish and Game
Coastal Access Points	Access points on this map are based on information from the California Coastal Commission and do not represent a comprehensive list of access points in the study region.	California Coastal Commission
Essential Fish Habitat Coservation Areas	These data depict Essential Fish Habitat (EFH) conservation areas off Washington, Oregon, and California. The coordinate locations are from NMFS' Final Rule to implement Amendment 19 to the Pacific Coast Groundfish Fishery Management Plan (71 FR 27408; May 11, 2006). In order to minimize to the extent practicable adverse effects from fishing, the final rule prohibits fishing with various gear types within these areas. Consult the text of the final rule for specific details about each area and the management measures. The prohibitions are listed in Section 660.306 and the official coordinates are listed in Sections 660.397, 660.398, and 660.399 of the final rule.	NOAA, National Marine Fisheries Service
Existing State Marine Protected Areas	These boundaries were developed using legal definitions of California marine protected areas found in Title 14, California Code of Regulations, Section 632(b). The boundaries described are solely intended as a visual representation of the areas included and do not replace or supercede the legal definitions.	California Department of Fish and Game
Fishing Piers And Jetties	Man made survey sites queried from the California Recreational Fisheries Survey (CRFS) Sites database.	Pacific States Marine Fisheries Commission - California Recreational Fisheries Survey
Kelp Bed Leases	Kelp beds along the coast of California are a critical habitat for many important sport and commercial species of invertebrates and fishes. Title 14, California Code of Regulations, designates 87 "Administrative Kelp Beds" (hereinafter kelp beds) for the purposes of managing commercial kelp harvst. The 87 kelp beds extend from the U.S.A.-Mexico International Boundary to the California-Oregon Boundary. They also surround the following islands, Anacapa, San Clemente, San Miguel, San Nicolas, Santa Barbara, Santa Catalina, Santa Cruz and Santa Rosa. Kelp beds may be leased by individual harvesters for the right to exclusively take kelp. Certain kelp beds are designated in Title 14 as unavailable for lease, or open to harvest by any licensed commercial harvester. Other beds are designated as closed to harvest.	California Department of Fish and Game
Marine Managed Areas	Existing marine and coastal managed areas include mapped spatial regulations other than state marine protected areas. Further spatial information on these areas will be included in subsequent versions of this document. Information on aquaculture depicted on this map is not comprehensive.	California Department of Fish and Game
Ports & Harbors	Coastal ports used by marine fisheries for the landing and sale of fish and invertebrates.	California Department of Fish and Game
Power Plants	This layer is considered draft and is subject to change.	California Energy Comission 2004 (updates pending)
Proposed Hydrokinetic Projects (Wave Farms)	Project area polygons were created based on applicants narrative descriptio	National Marine Fisheries Service
Shore Dive Locations	Shore dive locations for the NCSR obtained from www.shorediving.com.	Shore Dive Locations - www.shorediving.com
Spearfish Competition Sites	These locations show specific dive sites along the California coast as used by the Central California Diving Council (CenCal) for freedive spearfishing competitions.	Central California Diving Council
Terrestrial Managed Areas	A 1:100,000 polygon features class representing public, conservation and trust land ownership in the state of California. Developed for the California Resources Agency's Legacy Project, this dataset depicts ownership features as submitted by major public, trust, and non-profit groups in the state. PCTL04_1 is an update to the Legacy Project's PCTL03_1a geographic dataset, which was built upon a prior effort by the USBR to map public lands. Contributors to past datasets were contacted with requests for any updated lands. Agencies that had ownership changes or boundary adjustments were BLM (including NPS, USBR, and SLC), USFWS, CDFG, CDF, and CDPR. Major changes for the PCTL04_1 update included changes in data supplied by BLM. The changes were due to the agency's switch to a GCBD-based PLS. There were also improvements made to NPS boundaries from a joint effort between NPS and BLM. Changes in USFWS lands were primarily due to re-coding of ownership status. CDF and CDFG also had minor changes.	California Resources Agency Legacy Project
